Login, Registration, Update user details, Password Reset, Delete User.
REST API creation for Blog Create, Update, Retrieve and Delete (for blog create and retrieval, Niharika's APIs are used)
Unit testing of APIs with Postman.

Changes made post release-1:

- 3 Security questions and answers were added instead of a single security question and answer planned earlier.
- Forget password is replaced with reset-password page where security question check is done.
- Delete user profile has been added.
- Blog schema has been updated in MongoDB .
- Account info has been added to user profile to match with Blog schema design.
